GRAF Baby-Sono-Fix

The positioning device produced out of premium materials enables a fast and gentle examination without additional help. Exact badding and fixing guarantees precise examination results.

All materials are washable and in conformity with the newest standards

SAF-nap inserts (visco-elastic material) and header covers are separately available.

SONOGUIDE

The transducer guide system is a precision instrument for standardised scanning techniques. Tilting errors with consecutive diagnosis mistakes are avoided thereby.

The universal adapter is usable for all present systems and offers an optimum stability.

GRAF *Baby-Sono-Fix* and *SONOGUIDE*

Are standard equipments in order to correspond to the latest precision requirements

For optimum examination results

GRAF - *Baby-Sono-Fix* positioning device & *SONOGUIDE* transducer guide system
